

“
The main idea behind ICB has always been to offer superior quality solutions, whatever the application. That means having great products and offering professional technical backup, together with first-class customer support.

Into this mix, we try to carry out our business in as environmentally friendly a way as possible, and indeed in a friendly and socially responsible manner. This attitude has served us well for over 35 years and we aim for it to continue doing so.

Rob Jackson, Managing Director

”

Our Mission

To provide quality products backed up with the best technical support and service levels.

We achieve this by employing our core values of honesty and integrity in everything we do and using those to guide us in the decisions we make, conscious of the impact of those decisions on our colleagues, our customers, **and with sustainability in mind, the planet.**

Environmental Management.

At ICB, we are fully committed to the protection of the environment, prevention of pollution, compliance with current environmental legislation, and fulfilment of our compliance obligations.

ICB (Waterproofing) Ltd, ICB (Projects) Ltd, and ICB (Fabrications) Ltd.'s primary activity is the importation and distribution of specialised roofing materials, the design, and installation of roofing systems as well as the manufacturing of bespoke metal products.

We recognise that all activities have an impact on the environment at local, national, and global levels.

Our Management is accountable for the effectiveness of the environmental management system (EMS) and is responsible for ensuring that it is communicated, understood, implemented and maintained at all levels and across all ICB departments, and ultimately, that it achieves its intended outcomes.

Key Commitments.

Our key commitments are to:

- Maintain an Environmental Management System (EMS) certified to ISO14001:2015, to ensure that all operations are managed in accordance with a commitment to compliance obligations and to demonstrate due diligence
- Provide employees with the resources needed for the EMS, including support, direction, and encouragement to fulfil the requirements
- Source, as far as possible, recycled packaging and office consumables
- Purchase energy-efficient electronic equipment with the best possible life cycle
- Recycle company waste materials as much as possible
- Aim to achieve our environmental objectives relating to hazardous waste
- To use, wherever practicable, electronic communications and print as little as possible
- Encourage all employees to identify additional opportunities to reduce the environmental impact of the Company's activities.
- Pursue continual improvement in all aspects of the Company's activities

Active Sustainability.

It's easy to claim we're a sustainable company, but what does that look like in reality? What are we really doing to make a difference?

REUSE. RECYCLE.

Most of our products carry an Environmental Product Declaration (EPD) and not only are they manufactured to national and system-specific environmental protection requirements, they can also be recycled for use as ancillary products such as walkway tiles post-service-life.

We reuse and recycle aluminium off-cuts, too!

PRODUCTS.

Our products are among the most sustainable on the market, from our plasticiser-free EVA single ply membranes to the infinitely recyclable aluminium we use to manufacture our fabrications.

WORLD-LEADING EMS

We heard it from the horse's mouth; holding the ISO accreditation means we've **proven** that our services and processes are **world-class** in their quality, safety and efficiency. All three ICB companies are triple ISO accredited for both our Poole HQ and Scotland branches.

After over 10 years of successful ISO audits, we recognise our activities impact our environment, locally and nationally. As such, we aim minimise our impact throughout the life-cycle of each individual project and as a business as a whole.

International
Organization for
Standardization

CARBON OFFSET.

Carbon-neutral isn't new to us. We've held this status for over a decade now! In the last twelve months, we've offset 217 tonnes of carbon emissions through co2balance, on top of our own efforts.

DIGITAL FIRST.

We operate a digital first policy, avoiding using paper where possible.

By digitising our price lists & statements, distributing brochures by QR code and using email, SMS & telephone for communications and adding interactivity to all of our forms, we can minimise our business impact on the environment.

Fully Accredited.

Holding the ISO accreditation means we've proven that our services and processes are world-class in their quality, safety and efficiency. All three ICB companies are triple ISO accredited for both our Poole HQ and Scotland branches.

ISO 9001 – QUALITY

ISO 9001 IS THE INTERNATIONALLY RECOGNISED QUALITY MANAGEMENT SYSTEM (QMS) STANDARD.

Designed to be a powerful business improvement tool, ISO 9001 Quality Management certification has helped us to establish improvement frameworks, streamline operations and reduce costs that brings direct benefit to our clients.

ISO 14001 – ENVIRONMENTAL

ISO 14001 IS THE INTERNATIONAL STANDARD THAT SPECIFIES REQUIREMENTS FOR AN EFFECTIVE ENVIRONMENTAL MANAGEMENT SYSTEM (EMS).

We recognise our activities impact our environment, locally and nationally. As such we aim minimise our impact throughout the life-cycle of each individual project and as a business as a whole.

ISO 45001 – HEALTH & SAFETY

ISO 45001 IS THE INTERNATIONAL STANDARD THAT SPECIFIES REQUIREMENTS FOR IDENTIFYING AND CONTROLLING RISKS TO IMPROVE EMPLOYEE SAFETY, REDUCE WORKPLACE RISKS AND CREATE BETTER, SAFER WORKING CONDITIONS.

It's not just a tick box exercise. People are our greatest asset and we're committed to ensuring their well-being is safeguarded, as is any person who comes into contact with us during or after our operations.

We want to assure our customers that every one of our products, systems and services are second-to-none, and not only meet, but exceed expectations. That's why we're backed by the industry's leading associations, schemes and certifications.

LEADING ROOFING EXCELLENCE

The NFRC (National Federation Of Roofing Contractors) UK roofing trade association promotes quality contractors and quality products, ensuring that its members are at the forefront of all roofing developments. This keeps us not only current, but ahead of the game.

Safe2Torch is an NFRC campaign developed in partnership with contractor and manufacturer members, seeking to significantly reduce the risk of roof fires when using gas torches, either to dry out roofs or when used to install torch-on membranes. Our StrataPro SA System fully complies with the Safe2Torch guidance and enables an RBM system to be used on site where ALL torch applied works are prohibited.

Liquid Roofing and Waterproofing Association

The LRWA (Liquid Roofing and Waterproofing Association) represents the fastest growing sector of the construction industry. As LRWA members, we are devoted to best industry practice, offering advice on the properties, correct applications, installation methods and aftercare of liquid applied membranes

APPROVAL
INSPECTION
TESTING
CERTIFICATION
TECHNICAL APPROVALS FOR CONSTRUCTION

The British Board of Agrément (BBA) provides services that help clients create accountability and mitigate risk. Through extensive research, auditing, inspection, testing and certification, it helps to instil confidence in the products, services and systems created, designed and implemented throughout the entire supply chain.

All of our major waterproofing systems are backed by BBA certification.

Single Ply Roofing Association

SPRA (The Single Ply Roofing Association) is the voice of the single ply roofing industry. As SPRA members, we are actively involved in the monitoring, development and reporting of cutting-edge technologies to improve single ply products, installations and aftercare.

The Confederation of Roofing Contractors (CORC) is a roofing contractors' association consisting of some of the best roofing contractors in the industry. If you require a roof repair or even a completely new roof, our recommended roofers are there for you. We advise best practice and provide assurance of the quality and standards for work undertaken by our contractors.

Property Care
ASSOCIATION

The RIBA CPD Providers Network consists of over 500 manufacturers and suppliers, training companies and advisory organisations, who provide RIBA-approved CPD mostly free of charge, to architects and other specifiers.

Our CPD seminars have been meticulously combed through to gain RIBA approval. They help specifiers stay up to date, competent, professional, capable and resilient, also enabling them to learn new skills and specialisms.

The Property Care Association (PCA) is a trade association representing property specialists who can be trusted to resolve problems affecting your building. As members of the PCA, we have agreed to the Association's Code of Ethics & Conduct, and demonstrate our professionalism, credibility and technical excellence within the industry.

Our accreditations don't stop there. For us, quality is a top priority. We want to offer a gold standard in everything we do, so we aim to achieve the industry's most sought-after benchmarks.

Constructionline is a register for pre-qualified contractors and consultants working in the UK construction industry. The database is accessed by over 2000 organisations including central government, local authorities & main contractors, all whom require you to be accredited before beginning the tender process. **Constructionline Gold** demonstrates to buyers that our organisation has been subjected to increased scrutiny around governance and risk management, and allows us to bid for and win more work.

Builder's Profile is an open-access Common Database service that allows Main Contractors, Subcontractors and Audit partners to share Compliance and PQQ information. It addresses the costs, complexities and communication overheads of multiple PQQs. As a subscriber, we use a common database; the construction-industry standard that also integrates with and complements any Main Contractor, Audit Partner or Industry Procurement & Supply Chain Management service.

co2balance operates as a primary project developer and consultancy for organisations that are looking to certify their own projects under a carbon standard. Carbon-neutral isn't new to us. We've held this status for over a decade now, offsetting 217 tonnes of carbon emissions through the co2balance scheme in the last twelve months alone.

The Green Roof Organisation (GRO) is an independent, not-for-profit Trade Association representing the UK Green, Blue and BioSolar Roofing industries. We are dedicated to following the latest GRO Code, ensuring best practice in the design, selection of materials, installation and maintenance of green roof systems and includes reference to all relevant European and British Standards as appropriate.

CHAS is the UK's leading provider of compliance and risk management solutions, ensuring supply chain compliance, risk mitigation and efficient supply chain management. Our accredited contractor status means we can stay on top of ever-changing risk management standards.

The NiCEIC Approved Contractor Scheme is for electrical contractors undertaking design, installation, commissioning and maintenance of electrical installations to BS 7671.

NiCEIC's MCS Certification Scheme is a scheme designed **specifically for installation of renewable or microgeneration technologies**, introduced to help ensure good quality products and installations. By setting robust standards, the industry can continue to develop with confidence.

Being a certified MCS Contractor enables our customers to take advantage of current government incentives such as the Renewable Heat Incentive (RHI) and the Smart Export Guarantee (SEG).

The aim of the Renewable Energy Consumer Code is to ensure that consumers wishing to install a small-scale heat or power generation unit for their homes have the necessary confidence and service standards so that they can make an informed choice.

By being part of this scheme, we have agreed to comply with the consumer code, giving our customers peace of mind when choosing us for their Solar PV systems.

After almost 20 years in the solar game, we're proud to have formed strong associations with some of the biggest names in the industry. However, because we aren't limited to a single supplier, we can propose a system most suited to your requirements.

National Farmers Union, Stoneleigh Park, Coventry

The installation of a 36kWp solar PV system by ICB Projects on the £2 million Conference Centre at the National Farmers Union HQ in Stoneleigh Park, Warwickshire, could generate as much as £252,000 from the Government Feed-in-Tariff.

288 Thin-Film modules - which continue to work extremely well even in low light - were installed onto the flat roof of the single-storey, steel-framed conference centre. The roof consisted of over 800m² of ICB's alwittra® EVALON V® single ply membrane, using the unique SOLAFIX fixing system to attach all solar panels without any penetration of the high-performance membrane.
