

Fleet Fleece

Fleet Fleece is a synthetic-fibre fleece specially designed for use with Fleet PMMA waterproofing resins. The fleece enables the layer thickness to be controlled when applying waterproofing resins and also has a strengthening and crack-bridging effect in the hardened waterproofing layer.

MATERIAL

Mechanically strengthened and heat-set special synthetic-fibre fleece with a weight per unit area of 110 g/m².

PROPERTIES AND ADVANTAGES

- High tear strength and tear-propagation resistance
- High elongation at break
- Specially designed for use with Fleet waterproofing resins in terms of material properties, thickness and degree of density
- Facilitates easy and reliable application of waterproofing with layer thickness control function

AREAS OF APPLICATION

Fleet Fleece is used as reinforcement and to ensure a minimum layer thickness for Fleet waterproofing resins to create high-quality, flexible and crack-bridging waterproofing systems.

PACKAGING

- 10.50 cm X 50 m - 15.00 cm x 50 m
- 20.00 cm x 50 m - 26.00 cm x 50 m
- 35.00 cm x 50 m - 52.00 cm x 50 m
- 70.00 cm x 50 m - 105.00 cm x 50 m

COLOURS

White with grey drip print.

STORAGE

Store Fleet Fleece in a dry place, protected against moisture and dirt, and if possible, in a horizontal position.

PRODUCT APPLICATION

A single layer of the fleece is fully saturated with Fleet waterproofing resins when applied. The joints must have at least a 5 cm overlap. For further information please refer to the product information sheets for Fleet waterproofing resins.
